

Enex Technologies among the signatories of The UNGC manifesto “Business for People and Society”

Treviso, IT, 07 April 2025 – Enex Technologies, leader in the development of sustainable solutions for refrigeration, heating, ventilation, and air conditioning, is pleased to announce the signing of the UNGC Manifesto “*Business for People and Society*,” drafted by the UN Global Compact Network Italy, the local network of the United Nations Global Compact, representing the world’s largest corporate sustainability initiative.

“Business for People and Society” is a global call to businesses to adopt responsible and socially impactful business models, contributing to the development of more resilient and inclusive communities. The manifesto encourages companies to integrate ethical principles into their decision-making processes, promote decent working conditions, foster diversity and equal opportunities, and invest in initiatives that benefit society.

By signing the Manifesto, Enex Technologies commits to further strengthen the role of the social dimension in its business strategies and to create long-term value also in the supply chain and in the communities where it operates. The Manifesto is available [here](#).

Enex Technologies has been a participant of the United Nations Global Compact (UNGC) since August 26, 2024. This special initiative of the UN Secretary-General, has a mandate to lead and support the global business community in promoting the goals and values of the United Nations through responsible business practices.

With more than 20,000 participating companies and almost 3,000 non-profit signatories based in 167 countries and 63 Country Networks, the UN Global Compact is the world’s largest corporate sustainability initiative.

About Enex Technologies: Enex Technologies is a Climate Tech company born from the ambitious vision of industry veterans and pioneers in natural refrigeration systems, with the aim of transforming the HVACR industry with innovative solutions for the energy transition.

Its journey began in the 1930s by producing natural ammonia refrigeration systems, to which CO₂, propane and water were subsequently added as natural refrigerants with low global warming potential. Enex Technologies supplies HVACR equipment installers and end customers such as office buildings, hotels,

hospitals, supermarkets, data centers, distribution centers, cold storage warehouses, cold rooms and other industrial applications. Today, Enex Technologies employs over 1,000 people in 12 production sites distributed across 4 countries (Italy, France, Spain and Slovakia). As a participant of the United Nations Global Compact, Enex Technologies is committed to aligning strategies and operations with universal principles on human rights, labor, environment and anti-corruption, and taking actions that advance societal goals.
